

# INSTRUCTION SHEET

## DOUBLE BATCH (HHD) STACKING WITH CART

### Tools Required:

- Phillips Screwdriver
- 9/16" Drive Socket Wrench

### Installation Warnings - Read Before Lifting Oven

**⚠ WARNING:** Each oven weighs approximately 275 lb. (125 kg). Never lift with fewer than two people.

**⚠ WARNING:** Never lift the oven by the door handle. Doing so will cause the door to mis-align, resulting in a non-warranty service call.

**⚠ WARNING:** The ovens must be properly secured to an oven cart or food station at all times. TurboChef will not recognize a fallen oven as a warrantable claim and is not liable for any injuries that may result.

**⚠ WARNING:** Never stack ovens more than two high.

### Installing the Oven onto the Oven Cart:

#### STEP 1:

Ensure the oven cart casters are locked.

#### STEP 2:

Ensure the oven legs are removed.

**⚠ WARNING:** Never lift the oven by the door handle. Doing so will cause the door to misalign, resulting in a non-warranty service call.

#### STEP 3:

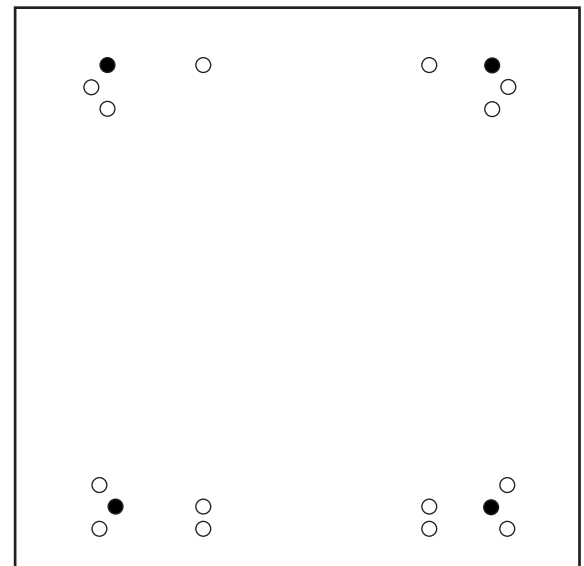

Place the oven on the oven cart using the procedure outlined in the Owner's Manual.

#### STEP 4:

Ensure the holes in the cart align with the leg holes of the oven.

#### NOTE:

Make sure to align the HHD legs with the correct holes in the cart. The proper holes are shown filled in the figure below.

## DOUBLE BATCH (HHD) STACKING WITH CART

### STEP 5:

Use the bolts and fasteners provided with the cart to secure the oven, as shown in Figure 1.

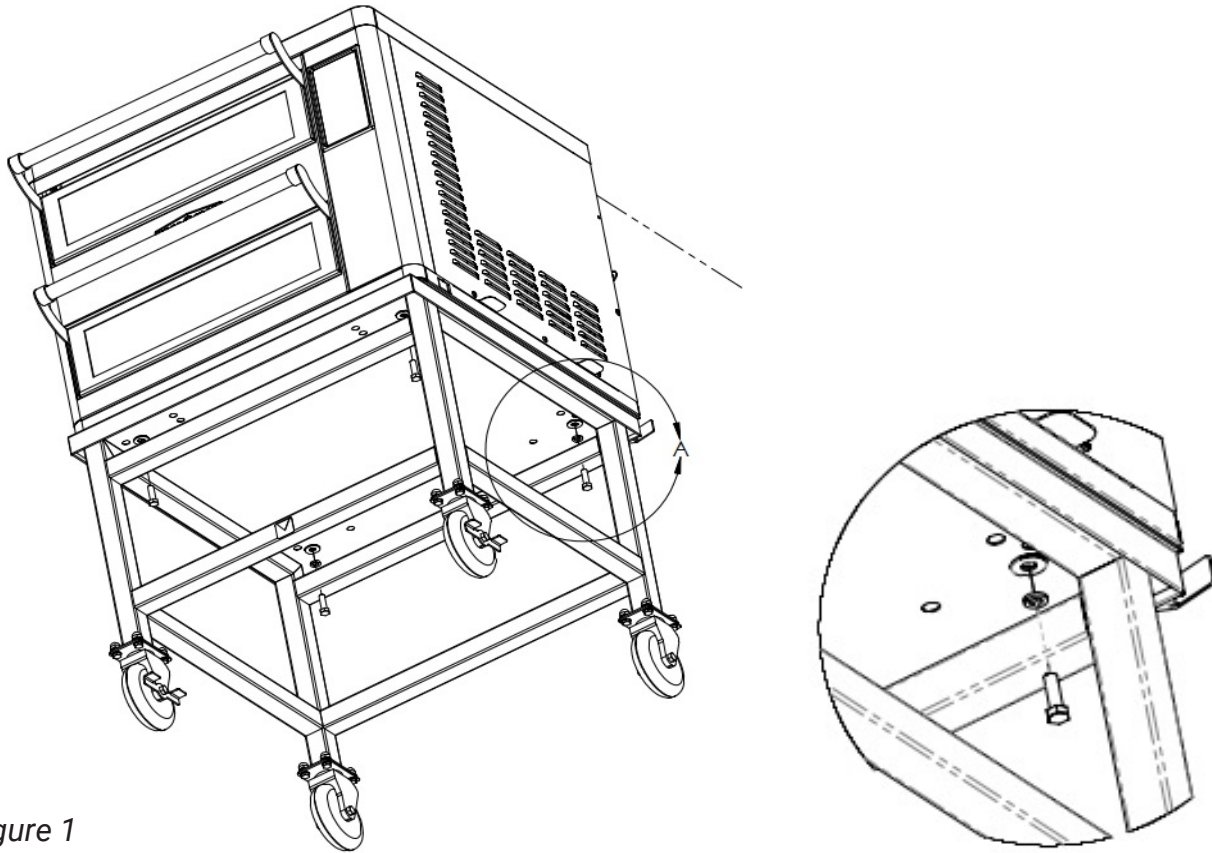

Figure 1

### Stacking the Ovens:

#### STEP 1:

Position one or more persons at the front and back of the top oven.

#### STEP 2:

Place hands under the top oven and lift.

#### STEP 3:

Stack the top oven on the bottom oven.
